curriculum vitae

born 01.11.1984 in Henstedt-Ulzburg, Germany

work experience

since 2016 **Professional Application Engineer / Build Manager, SBB CFF FFS.**

- creating an fully automated iOS/Android build pipeline
- developing the next generation continuous integration
- application operations manager continuous integration
- migration of infrastructure to amazon aws cloud
- planning team software engineering security
- planning team software quality
- software development self service application in spring boot

since 2004 **Software Engineer / IT-Consultant, mindrunner.**

- conducting freelance work as a software engineer and consultant

2010–2011 **Software Engineer, freifalt GmbH, Passau/Hamburg.**

- design and implementation of iOS-Apps and their backends
- responsible for the company's internal infrastructure, a virtualized, heterogeneous network

2005–2009 **Software Engineer, MSA Auer GmbH, Halstenbek/Berlin.**

- developing several core products of the company

certification / training

2018 **Certification, embarc.**

- Agile Software Architecture

2018 **Certification, DasScrumTeam.**

- Scrum Master

2018 **Training, SBB CFF FFS.**

- Railroad Academy - Train Know-How

- 2017 **Certification**, *CloudBees*.
○ Certified CloudBees Jenkins Engineer (CCJE)

education

- 2018–2019 **Nanodegree**, *Udacity*.
○ Blockchain Developer
- 2014–2015 **Master of Information Technology**, *Queensland University of Technology*, Brisbane, Australia.
○ Graded: 7 (High Distinction)
○ Software Architecture (Advanced)
- 2015 **Master Thesis**, [*Python, C, Java, VHDL, git, L^AT_EX*], QUT, Schatz Forensic.
○ In this project, a low level framework with the goal of reading raw NAND flash devices found on SD-Cards and USB-drives was created. The hardware/software co-design runs on a Pipistrello FPGA board and enables dynamic pin assignment, high speed block orientated I/O and voltage variation to particular pins on the hardware side, as well as a serial interface to an attached remote machine for configuring the hardware and read data from the NAND flash on the software side.
- 2013–2014 **M.Sc. Information Technology**, *University*, Lübeck, Master of Science.
○ Software Systems Engineering
- 2013 **Software Systems Engineering Laboratory**, [*Java, Maven, Jenkins, git, L^AT_EX*], Uni Lübeck.
○ required course for every Software Systems Engineering student
- 2009–2012 **B.Sc. Information Technology**, *University*, Passau, Bachelor of Science.
○ Graded 1.9
○ Minor: Business Administration
- 2012 **Bachelor Thesis**, [*C++, L^AT_EX*], Uni Passau, <http://www.uni-passau.de>.
○ planning and implementing an easy-to-use class library on top of a proprietary SDK for prototyping perception platforms with the goal to automate testing within the whole research project (Graded: 1.3)
- 2012 **Research Assistant**, [*C++*], Uni Passau.
○ developing and troubleshooting of plugins for a perception platform
○ developing of algorithms for automated image and pattern recognition
- 2011 **Software Engineering Laboratory**, [*Java, Maven, Jenkins, git, L^AT_EX*], Uni Passau.
○ Graded 1.0
○ required course for every Information Technology student
○ funCKit is an editor and simulator for digital circuits
○ the source is released under the GPL
(<https://github.com/mindrunner/funCKit>)
- 2005–2008 **Theoretical Vocational Training**, *Vocational School*, Elmshorn, IT specialist.
○ Software Developer
- 2005–2008 **Practical Vocational Training**, *TecBOS GmbH*, Halstenbek, IT specialist.
○ Software Developer
- 1995–2004 **High School**, *Dietrich-Bonhoeffer-Gymnasium*, Quickborn.

projects

- 2015 **Android Application**, [*Java, Android, Gradle, git-flow, Jira*].
- development of an android app for a social network startup company
 - focus on cutting edge android technology
 - REST client / ContentProvider / SyncProvider / material design
- 2014 **TouchIt**, [*Java, Android, Gradle, git, libGDX*].
- development of an android game based on libGDX
 - published in Google's play store
 - published the source code (GPLv3)
 - <https://github.com/mindrunner/touch-it>
- 2013–2014 **brightup GmbH**, [*Java, C, .NET, OpenEmbedded, git-flow, Jira, Jenkins, BuildBot, Android, iOS*], <http://www.brightup.de>.
- development of hardware and software for brightup's central unit and z-wave plugs
 - maintenance of general development tools and work flows (bug tracker, version control system, continuous integration)
 - consulting for cloud, smartphone applications and general technical decisions
- 2013 **PhotoBooth and Quickshot**, [*Java, Redmine, Jenkins, EDSDK (Canon)*].
- two kiosk machine applications for a photo studio
- 2013 **hantPlayer**, [*Objective-C, Redmine, AppKit*], <http://www.hantmade.com>.
- a native video player with special tagging functions
- 2013 **Stomt**, [*Java, MongoDB, Spring, git-flow*], <http://www.stomt.com>.
- consulting and the developing of backend and Android-App via pro bono
- 2012 **HydrostopEU**, [*Joomla, PHP*], <http://www.hydrostopeu.com>.
- complete webpage redesign
- 2012 **Nordflair Ticketsystem**, [*Java, Maven, Jenkins, JPA*], <http://nordflair-events.de/>.
- co-working on a web-based ticket and entry management system
 - developing the Java-Frontend entry terminal
- 2012 **Templogger**, [*Java, Maven, Jenkins, JPA*].
- custom service which receives data from GSM-Datalogger: once received, it stores the information into a database and sends warning e-mails according to threshold values
- 2010–2011 **usAR-Hamburg**, [*Java, Maven, Jenkins, JPA, iOS*], freifalt GmbH, <http://www.freifalt.com>.
- iOS-App which shows up public transportation based on augmented reality
- 2005–2009 **TecBOS.replication**, [*Delphi*], TecBOS GmbH, <http://tecbos.com>.
- developing a set of windows services with the aim to automatically replicate multiple TecBOS-Databases
- 2005–2009 **TecBOS.mobile**, [*C, Sqlite*], TecBOS GmbH, <http://tecbos.com>.
- Mobile Windows CE Devices can exchange data with the TecBOS.solutions
- 2005–2009 **TecBOS.webaccess**, [*C#, firebird*], TecBOS GmbH, <http://tecbos.com>.
- porting the native TecBOS.solutions into a web application
- 2005–2009 **TecBOS.solutions**, [*Delphi, firebird*], TecBOS GmbH, <http://tecbos.com>.
- maintaining and developing parts of the application as part of my apprenticeship and subsequent employment

2008 **CMS, [MySQL, PHP].**

- developing a whole content management system within one week

2005–2008 **Web shop, [MySQL, PHP], fontinform GmbH, <http://www.fontinform.com>.**

- planning and development of a web shop for digital fonts

tech skills

A word cloud of various technologies and tools. The words are arranged in a roughly circular pattern, with 'Linux' and 'Java' being the largest. Other prominent words include 'Vim', 'Git', 'AWS', 'Jenkins', 'Python', 'C', 'Monitoring', 'Docker', 'Solidity', 'C++', 'node.js', 'Crypto', 'LaTeX', and 'Monitoring'.

languages

German Native
English Fluent
French Basic
Polish Beginner

personal interests

- rock climbing
- trail running
- meditation
- yoga
- mountain biking
- travelling
